MICHELLE 2-row

Plant development and vitality:

Ear emergence	
Maturity	

Yield structure:

Ears/m ²	
Grains/ear	
TGW	

Sowing:

Time of sowing	beginning of March until middle of April
Seed rate	locally adapted

Straw:

Plant height	short
Lodging resistance	
Plant growth regulators	in EC 37-47 combined with leaf protection

Disease resistance:

Mildew	
Net blotch	
Rhynchosporium	
Brown rust	
Plant protection	One preventive application from EC 39 against leaf spots and brown rust. No treatment against mildew, due to Mlo-resistance

Quality:

Grading (> 2,5 mm)	
Hectolitre weight	
Raw protein content	very low
